uniquemarble

Unique Marble: the unseen face of marble

Marble has always played an important role in art and architecture, embodying style and uniqueness in every furnishing solution.

Unique Marble brings together five of the world's most exclusive marbles and reinterprets them for contemporary taste in a complete, original project. From the timeless elegance of Royal Calacatta to the strong personality of Bianco Siena, the expressive power of Moon Grey, the intensity of Paonazetto and the sophistication of Sahara Noir. Natural beauty and creativity merge in this unusual, sophisticated project, which offers a new aesthetic, shaped by blending the elegance of marbles with the transparency and fluidity of resin.

The vein patterns and depth of the marble stand out thanks to the harmonious contrast with the monochrome effect of the resin, creating a sophisticated texture ideal for settings with a strong character.

SANICERAMIC GROUP

The Group's activity began in 1975 with the company Sanitrex as agents of ceramic tile factories for Arab countries, although Saniceramic wasn't constituted until 1993. In 2007, the second generation of the family decided to undertake a project to commercialize our own brand of ceramic products with the purpose of becoming a reference for trading companies in this industry. To this end, manufacturing agreements were signed with factories of the tile industry, so that we could subcontract their production, guaranteeing the best quality for the product and best service for our customers. In 2010, our main goal was market diversification so we started to focus on marketing our own brand and our products worldwide. Today, this project is a fact with a diversification in the markets that guarantees growth and sustainability.

In 1994, a ceramic technician with an extensive experience decided to carry out his inquisitiveness into a new project. At that moment, the production lines of Baldocer were activated and started to produce, with the support of an admirable team and loyal clients from the beginning.

Just over a year later, after multiply the production, Baldocer expanded the facilities to many areas of the province of Castellón. It has been growing since then, and progresses with clear strategies attending all the markets (more than 130 countries), with new production lines, new formats and new ceramic clays. The best quality and price with the latest design and technology.

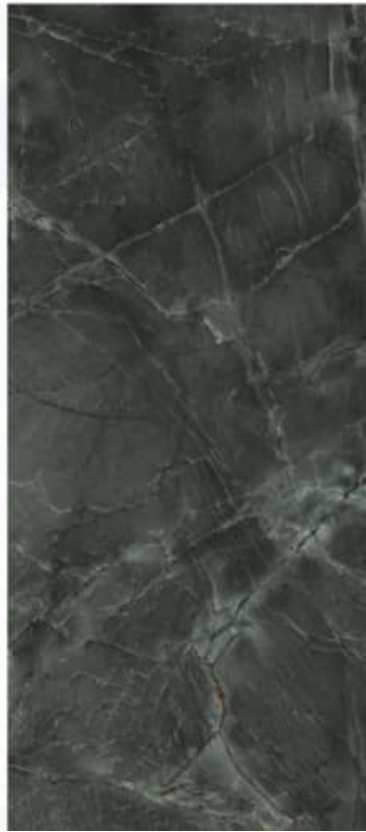

Nowadays, Baldocer's facilities are supported by more than 400.000 m² of industrial ground, which turns us into one of the main firms in the ceramic industry in Castellon. Baldocer, is not just the story of a man, but the history of a team made by exceptional workers, loyal clients and excellent suppliers.

UNIQUE TRAVERTINE

Unique Travertine, boundless architectural potentials

Unique Travertine is an anthem to the tactile beauty of travertine stone. It is a lovely, versatile collection that reinterprets a classical material from a fresh, highly contemporary viewpoint: a complete project, with additional inspiration from the different ways travertine can be shaped.

The very varied range runs from the most natural options, such as Vein Cut, with the familiar lengthwise vein pattern created by cutting in the vein direction, Minimal, inspired by the way the underside of the travertine slab is shaped, through to more unusual versions, such as Ruled, with its many three-dimensional grooves and ruts, and Ancient, with a sophisticated timeworn effect ideal for period renovations and projects with a vintage mood.

Unique Travertine is the ideal blend of a classical material and contemporary architectural potential, a complete, attractive assortment of materials that can combine to create design schemes with a distinctive, unique character, from the most traditional to the most daring and experimental.

Un nuevo concepto de cerámica ha nacido. ProConcept es una nueva forma de concebir la cerámica como nunca antes. Porque creamos que era el momento de avanzar, hemos innovado y trabajado más que nunca para lanzar al mercado pavimentos y revestimientos cerámicos que promueven, impulsan y apoyan un nuevo cariz a los proyectos de decoración. Nuevas posibilidades. La nueva era de la cerámica ha llegado.

PROJECT PROCESS PROGRESS PROCONCEPT

A new ceramic concept has been born. ProConcept is a new way of conceiving ceramic as never before. Because we thought it was time to move forward, we have innovated and worked harder than ever to launch ceramic floor tiles and wall tiles that promote, boost and add a new touch to decoration projects. New possibilities. The new era of ceramics has arrived.

The RAW Concept

على آخر صيحات التصميم ، حيث تركز على أصل المواد الخام ، دون تكلف أو إستحسان الأصالة هو الشكل الجديد للتقدم. كما تركز الفتراحيات -لتظهر الجانب الأكثر حقيقة للقطع ، كما لو كانت مأخوذة مباشرة من الطبيعة. تقدم مجموعة واسعة من الخشب والأحجار والأجر والسيراميك ذات اللون الواحد ، حيث تم تلميع كل عروق وخاصة للقطعة بمثابة استخراج جوانب الديكور الأكثر حرفية. على ، بالهدوء والسكينة ، حيث تكون الألوان المحايدة مثل الأبيض والرمادي والألوان الترابية هي نجوم المساحة "RAW" نعمنا

To evoke authenticity is the new form of progress. As with the latest design trends, Proconcept focuses on the origin of raw material -without eccentricity or artifice- to show the most genuine side of the pieces, as taken directly from nature. A wide range of wood, stones, marble and single-colour ceramics, where each vein and feature of the piece has been worked down to the last detail to extract the most artizan aside to decoration. A RAW style filled with calm and serenity where neutral colours -white, grey and earth- are the main protagonists.

TECHNICAL SOLUTIONS

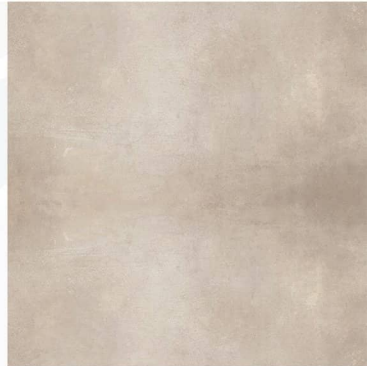

LOOKING TO THE FUTURE, WHILE WE VALUE THE PAST

We started our business at the beginning of the 70s within the ceramic industry of the Valencian Community with a strong philosophy of traditional work and artisanry.

Throughout our professional career we have adapted our production processes and market technologies to our current needs to generate unique and functional materials, transforming traditional processes into modern ones, based on research of habitat trends and design.

All of this allows us to offer high-quality cutting-edge technical and aesthetic solutions that contribute added value to each project.
